**StairMax Stairnose:**

**Shade Variance:** Natural products like wood flooring have inherent color & shade variations. The degree of variation is related to the species and the grading.

**Light Sensitivity:** Wood flooring is light sensitive. Over time, the color of wood naturally changes when exposed to light. Natural UV light and direct sunlight results in the greatest amount of change. The lighting in the room can affect the color of the wood floor.

**Reactive Stains & Light Sensitivity:** Wood species with higher tannins, like European White Oak, finished with Reactive Stains inherently have a higher sensitivity to light and color change.

¾" Solid Hardwood

Engineered

Solid Hardwood = 4mm Wear Layer

terra legno Engineered Flooring offers the exact look and refinishing features of solid wood flooring with superior dimensional stability and performance of engineered construction.

## INSTALLATION

**Methods:** Staple Nail & Glue Assist, Staple / Nail & Glue Down, Glue Down, Floating, Nail Down Installation
